Design • Installation • Testing • Servicing • Maintenance

- ✓ 24/7 Call Out Facility
- ✓ 60 Years of Experience
- ✓ NSI Gold Accredited
- ✓ British Made Products

## Design and Installation

OHEAP Fire & Security design NSI Gold accredited CCTV systems around your budget, time frame and site's risk profile.

Our team of expert consultants conduct a comprehensive site survey to identify risk areas and blind spots. Then we deliver a tailored installation aligned to your business' schedule. Minimal downtime, optimal coverage.

## Monitoring and Servicing

OHEAP Fire & Security offer 24/7 support for CCTV systems. We offer professional servicing twice a year and annually.

Our CCTV design, installation and maintenance services are accredited to the highest standards. This includes the stringent NCP 104 and BS EN 62676 requirements.

## Design and Installation

OHEAP Fire & Security design NSI Gold accredited access control systems around your budget, time frame and site's risk profile.

Our expert sales team first conduct a detailed site survey to identify risks and blind spots. This is followed by a tailored installation built around your schedule to minimise downtime and maximise coverage.

## Monitoring and Servicing

As Paxton Gold Partners, we provide 24/7 maintenance for access control systems.

Our engineers support sites by delivering rapid response through integrated monitoring and key holding services any time an alarm is triggered.

## Key Cards

Access control key cards enable greater administrative control and improved efficiency. Stolen or lost key cards can easily be deactivated or replaced.

## Biometrics

Biometric access control systems use advanced ID methods such as voice recognition and retinal or fingerprint scanning to enhance security.

## Barriers

Barrier access controls restrict unauthorised access through physical obstructions. Entry is controlled via fobs, key cards, or biometric credentials.

## 24/7 Expert Support

To ensure ongoing security and compliance, OHEAP Fire & Security provides 24/7 monitoring and maintenance of access control systems across the UK.
